OCEANAIRE PAC6012

5-TON Portable Conditioner

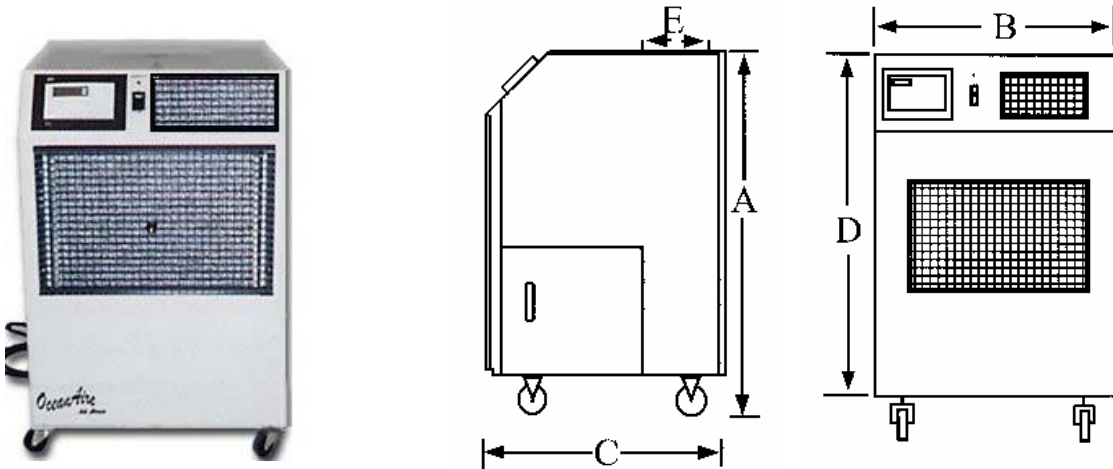

AIR-COOLED COMMERCIAL RENTAL UNIT

APPLICATION:

These self-contained portable air conditioners should be located inside the room to be cooled.

These self-contained portable air conditioners are designed to be located inside the room to be cooled. The heat is rejected outside of the room by venting the condenser air discharge outside. Typically this is up into the false ceiling space (if the building has a central HVAC system, and it functions as the building return air plenum). The condenser outlet has a flange for connection to flex duct. The unit includes a standard automatic condensate pump.

Unit Dimensions (inches)						
Model	A	B	C	D	E	Weight
PAC6012	52.25	28.25	46.0	46.5	16.0 round	540 lbs.

Electrical Specifications				Compressor Data
